

Mazak asked me to remove several files from "Downloads" on the IntegrexMachinst.com homepage. This was so that 5 axis machining technology would not fall into the wrong hands. I ask them to provide me with information that would help people who come to Integrexmachinist.com to get the removed files and documents from Mazak. Mazak has not got back to me.

This file (hobbing setup & sample.pdf) explained how to setup and program Hobbing (option required) on the 640MTPro Integrex control.
